

Should You Change your oil every 3,000 miles?

(The answer is not the same for everyone)

The answer is, really it **DEPENDS...**

I know, you hate that answer, I do too.

Unfortunately it's not as simple as it used to be, there are many variables that come into play today.

Different vehicles require types of oils, some oils last longer than others!

Here's the **Bottom Line**, if you don't use the proper oil and change it at the proper intervals you **WILL void your warranty from the manufacturer!!!**

We're here to help sort it out...

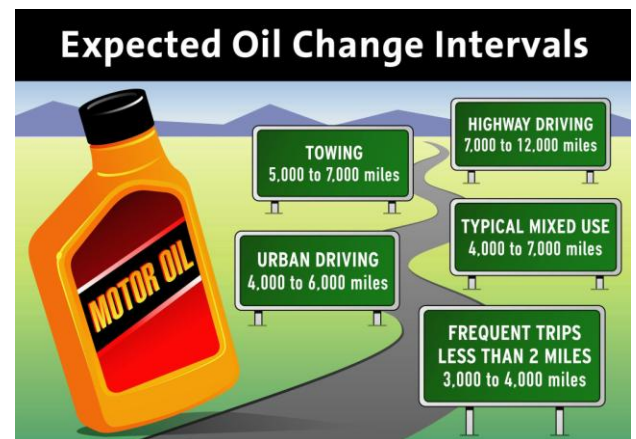

We at **Kehoe Automotive Center** will **always replace** the oil in your vehicle with the **type of oil the manufacturer recommends**. This may not always be true of every repair facility, which could result in your warranty being voided.

We'll Simplify Your Life...

... That's our job, don't hesitate to **ask us**.

It can be confusing and **shouldn't be taken lightly**.

Simplify YOUR Life, bring your car to us and we'll let you know what's best for your vehicle and your budget!
